

Chapter 1 Test Review

1. Know your vocabulary!
2. Understand the difference between primary and secondary sources and be able to give examples. [Objects, documents, diaries, maps, photos, etc. versus a book about the subject.]
3. Understand what a historian does and how that is like a detective.
4. Think about what type of questions historians ask about artifacts to find out as much information as possible.

That's it! It's a short first chapter. You will do well if you review.
